MESSAGE FROM THE SECRETARY AND CORRESPONDENT

All praise to the Almighty Allah. I am glad that like a snowball, our college is growing gradually and steadily. We are in the process of Reaccreditation and Insha Allah we shall get a better grade this time. Autonomy is another goal which also we hope to achieve shortly, Insha Allah. The Golden Jubilee of our college will be celebrated in the near future and I am delighted to know the fact that our institution has rendered yeoman service to the community at large and to the Muslim community in particular in the duty of imparting higher education.

New Library buildings and class rooms are coming up. Thanks to the UGC and our college Departments for financial and institutional assistance and cooperation. I hope this will continue ever to make us a proud and more popular. I hope the day is not far off for us to become a College with Potential for Excellence.

The college magazine is a colorful and beautiful feature of our college which gives space for the creations of our students and the staff. By the Grace of Allah, it has remained and shall ever remain a feather in our cap.

M.NAZAR MOHAMED
SECRETARY & CORRESPONDENT

Message from the principal and editor-in-chief

Show me your friend and I will show you who you are is an adage in English. It points to our understanding one thing with reference to another. A college magazine is like your friend and it will certainly show who you are. It will speak of your quality and experience. It will give you a taste of what we are. And a page shall speak volumes, I am sure. Our college magazine has already been adjudged one of the best magazines in a competition in the recent past. And the day is not far off for it to bag the first prize or the first position.

The college magazine gives space for creative talents. Without censure. It is perhaps the first opportunity for future writers to train themselves. It is the test drive and a joy ride too for them. It gives them the experience of expression and exposure. And it included not only the students but also the teachers, not only the learners but also the learned. Yes, learning has no end. It continues till one breathes last.

Even a glance or glimpse of the magazine is sure to convince anyone of the quality of its contents and its production. The soul would be as beautiful as the body. Information, imagination, creation and contribution - all have their residence here in the magazine and move towards perfection.

I thank the Management, the Faculty, the Student-talents and the Editorial Board for all their meticulous care and attention given to the production of the magazine. I hope better outcome shall honor us in the future in this direction too.

Prof. Dr. P. M. Aadil Ahmed

Principal

message from the associate editor

Why do you fall down or ride wrongly when you learn to ride a bike? Is there any rule that one must make some mistakes while learning? Can't one learn without a mistake or a fall? No. No one can. Why? It is because of the clash between your Conscious and Sub-Conscious Minds. Or we can say that it is because of the faster action of the emotional part of the brain - fear in this case - than that of your intellectual part! Yes. According to science about the evolution of the human brain, even before the neo-cortex was formed, amygdala, the emotional part of the brain came into being. While the intellectual part of the brain operates in on thousandth of a second, the emotional part acts in one ten thousandth of a second! Yes. It holds true of not only the emotional part of the brain but the intuitional and creative part of it also. And that's what makes one a writer, a creator, an artist, a painter and what not.

To write, to pain, to sing, to compose, to create in short, one has to be emotionally intelligent. And that needs a lot of training. A college magazine is the finest and fittest place to take that training. Free. Kambans and Miltons of the future are to be found budding in a college magazine. Though some editing is done to remove anything controversial or spurious, the college magazine offers the budding talents the best opportunity to express themselves completely and emphatically. It acts as a boost to them. The contributions come from not only students but also the staff members.

While we were a little lenient with the student contributors, we could not be so with the teacher contributions for the simple reason that their place and position, stand and status remain higher and more different. We had to look for values and worth in their writings and not choose them for creativity or imagination alone.

And one has to be very careful about the 'cut and paste' culture which has become inevitable when we are googling. That has also been taken care of. I hope this academic year's Al Mudassir will also be an angel among many witches of magazines

VISION & MISSION

VISION AND MISSION

- ❖ To bring out the hidden potentials of individuals through comprehensive higher learning.
- ❖ To open the doors of opportunities through updating and modernizing course content.
- ❖ To provide secular education in conformity with global needs.

The institution aims at encouraging and improving secular and moral education of youth.

College Motto

Striver Secures Success

AMES - A BRIEF HISTORY

The Ambur Muslim Educational Society, founded in the year 1905, made a humble beginning by starting a small elementary school for boys. Like a snowball, it has now grown bigger over the years. It has seven educational institutions managed and maintained by it at present. They are:

1. Mazharul Uloom College
2. Mazharul Uloom Hr Sec School
3. Mazharul Uloom Primary School
4. Mazharul Uloom Coaching Centre for Women
5. Hasnath-e-Jariah Girls' Hr Sec School
6. Hasnath-e-Jariah Girls' Primary School
7. AMES College of Education

Islam has given immense importance to education and spreading of knowledge. Prophet Muhammad (pbuh) has categorically stated that every Muslim boy and girl must be given education. He even released prisoners of war for teaching the Muslims learn to read and write and treated that as a ransom, an event that has no parallel in history. There are many of his Sayings relating to the importance of education, such as:

1. Seeking education is compulsory for both men and women.
2. The ink of the scholar is holier than the blood of the martyr.
3. Seek knowledge even if it be in China.

The educational backwardness of the Muslim community moved the altruistic heart of the tireless social activist, Janab T Abdullah Sahib, who thought of doing something to improve the condition. With the support of some prominent Muslims, he started Madrasa-e-Mazharul Uloom, a small school meant for students of all communities. However, his primary intent was to uplift the Muslim community educationally, economically and culturally. He was rightly honored with the appellation 'Sir Syed of Ambur'.

The caravan of the AMES with its dedicated team is on the march, transforming the society to take up to modern education for the future betterment and make our country India stronger in all dimensions.

AMES celebrated its centenary in a grand manner on 04th, 05th and 06th September, 2006 at the Mazharul Uloom Hr Sec School premises and the then President of India, Dr A P J Abdul Kalam, inaugurated the function, interacted with the students who had gathered there from different institutions and delivered his inspiring speech.

MUC - A BRIEF HISTORY

The Mazharul Uloom College was founded by the Ambur Muslim Educational Society (AMES) in 1969 with the united efforts of a dedicated team under the initiative, support and guidance of the great leather industrialist and philanthropist late Janab Anaikar Abdul Shukoor Sahib.

The College started with a few students and has now grown over the years like a snowball with increasing number of students and teaching and non teaching staff catering to the ever increasing student population. It is situated on its own grounds of 20.5 acres along with the newly founded AMES College of Education from the academic year 2003-2004.

The College, true to the vision of its founders, caters to learners at large transcending the limits of caste, colour and creed with five UG courses in the Day College and Seven UG, Four PG courses and also a Research Programme in the Evening College.

The college was upgraded to First Grade with the affiliation of B.A. (Econ.) and B.Sc. (Maths) for the academic year 1971-1972. The University of Madras granted affiliation to B.Com., Course from the academic year 1975-1976, B.A. Corporate Secretaryship (B.C.S.) course from 1984 - 1985, and B.Sc. Computer Science from 1987-1988. Degree classes started functioning in the newly constructed permanent building from 24.01.1972. B.A. (Eco.) course was converted as B.A. (Corporate Economics with computer application) from the academic year 2002 - 2003.

Another mile - stone in the history of the College is the commencing of Evening College within the same permises from the academic year 1995 - 1996 with B.Sc. (Computer Science), B.B.A., in 1996-1997 and B.Sc. Microbiology course in 1997-1998. In the year 2000-2001 B.C.A., was started. In the year 2007-2008 PG Courses, M.Sc. IT & M.Com. were started. In the year 2009 - 2010 B.Sc ISM, in 2010-2011 B.Com CA in 2011-2012 B.A. English were started. In the year 2012-2013 two more PG Courses, MA English & M.Sc Mathametics were started.

In the same year, 2012-2013 Research Programmes M.Phil in Computer Science and Commerce, both full time and part time were started, in addition to the Ph.D part time in Commerce and English that we already have.

“Mazharul Uloom” means the threshold of knowledge or the fountain of knowledge. It refers to the source from where knowledge flows.

The **College Motto is “Striver Secures Success”** and its emblem has four symbols in it- crescent, lotus, book and torch symbolizing growth, knowledge, source of learning and light dispelling darkness of ignorance respectively. The staff and the Management expect every student of the institution to live upto the Motto of the College.

The College apart from its regular courses imparts moral and value education to the students. The teaching plan gives quality education to the students to enable them to become good citizens of our country.

The College also conducts awareness campaigns, personality development and serviceoriented programs etc. to instill leadership qualities, human values, team spirit, etc. in the minds of the students.

Principal's Annual Report

2014-2015

Mr. President, Revered Chief Guest, Honorable General Secretary Sahib, Distinguished Secretary & Correspondent Sahib, Distinguished Members of the Executive Committee, Learned Vice-Presidents of the Various Associations of the College Union, Dear Student Office-bearers, the Dignitaries on and off the dais, Respected Head of the Departments, Members of the Various Faculty, and Dear Students, Assalam-ualaikum.

I am pleased to present before you a brief report on the functioning of Mazharul Uloom College for the Academic Year 2014-15.

After the summer vacation the college reopened on Wednesday, 18th June 2014. We had a semester break during November / December 2014 and the college reopened again on Monday, 8th December 2014 for the even semester. At present the total strength of the College is 1090, Day (573) and Evening (517) respectively.

1. Courses Offered

We all know that the college offers 5 UG courses in the Day and 7 UG, 4 PG and 2 Research Programmes in M. Phil. (Commerce & Computer Science, Fulltime/ Part-time) in the Evening College and also Ph.D. Programmes in Commerce and English (Part-time). We have applied to get fresh affiliation to start two new research courses, M. Phil. in English and Mathematics

- ① ② The work of setting an English Language Lab and installation of Public Addressing System are in progress with the UGC assistance.
- ① ② There is a proposal to buy one Heavy Duty Copying Machine and a UPS for the computer lab with the UGC assistance.
- ① ② The existing BSNL Broad Band internet connection has been upgraded from existing 4.5Mbps to 10 under NMEICT project with the UGC assistance

17. New Projects under constructions:

- ① ② To have more infrastructures in terms of class rooms, a section for Controller of Examinations and also a central library, the following projects were undertaken.
- ① ② Project I: By the grace of Allah construction work for a new building in place of the old cycle stand adjacent to the auditorium to house 4 class-rooms in the ground floor estimated a cost of 27.0 lakhs has commenced and the work is in progress.
- ① ② Project II: The work for 5 class-rooms in the first floor of the office block with the lift facility on Friday was taken up on 14th March 2014 after Jumma Prayer is well in progress and is estimated a cost of Rs 47 lakhs.
- ① ② Project III: The Construction of Moulana Abul Kalam Azad Central Library Building with 6092 square feet and with the Mezzanine Floor was inaugurated on Wednesday 26th November 2014 by Alijanab Alhaj N. Mohamed Sayeed Sahib, Hon'y General Secretary, Ambur Muslim Educational Society with an estimated cost of Rs 58,80,000. UGC has extended Rs 8 lakhs as grant of which we have received Rs 4 lakhs and the rest has to be borne by the management.

18. NAAC Re-accreditation and Autonomous:

As we were already accredited with B+ grade, now it is time to go for reaccreditation and the work is in progress.

The UGC insists to go for autonomous status. Alhamdulliah, we have made the beginning and have applied to the UGC.

19. UGC Assistance:

The utilization of UGC assistance under various heads for the XII plan period, like Plan Block Development Grant (PBDG), Additional Assistance, Under Graduate Assistance, financial assistance for the establishment of IQAC are well in progress.

Major Research Individual Project of Rs. 9.32 lakhs was approved by UGC for Dr. K. H. Kaleemullah, HOD of Urdu, and a first installment of Rs. 6.64 lakhs was received.

Two Day UGC Sponsored English National Seminar was conducted with the UGC assistance of Rs 100000.

Two Day UGC Sponsored Urdu National Seminar was conducted with the UGC assistance of Rs 150000, of which an advance amount of Rs 120000 was received.

20. Conclusion

I pray to Allah Jallashanahu for His guidance in discharging my responsibilities in the humblest way and I am confident that the Committed Management led by the President, Vice-Presidents, the Hon'y. General Secretary Sahib, Respected Secretary & Correspondent Sahib, Executive Committee Members, dedicated Staff Members (Teaching & Non-Teaching), Students and Parents would help me steer this college on the path of growth.

I thank the President, Vice Presidents and the Hon'y. General Secretary Sahib, the Secretary & Correspondent Sahib, and all the Executive Committee Members for their guidance, encouragement and fullest support.

I thank the Members of Faculties, Teaching and Non-Teaching for their co-operation in the smooth functioning of the College. I thank the Students office-bearers and all Students for their co-operation and inspiring performances. Jazakallah.

AMBUR

Dr. P. M. AADIL AHMED

16.03.2015

PRINCIPAL

THE LIGHT OF DARKNESS

Dr. A.S. Mohamed Rafee
Associate Prof & Head
PG & Research Dept of English

I love darkness
More than brightness

The seed grows
Under the gloom of the ground
And the baby
In the gloom of the womb

Everything is brought forth
From beautiful creative gloom

Moon rises
As the night falls
And love rises
When the dark calls

Light may come and go But
the amity of darkness Has
never turned a foe

We can always trust
Darkness
That never wears
Fading colors of
False brightness

In darkness we begin In
darkness we end
Darkness is all we have In
the womb
In the tomb.

Communication

A KEY TO SUCCESS

M. Mohammed Ismail

Asst Prof, Dept of Computer Science

- ⌚ I have a doubt: whether it is possible for a person to fall in love from distance?. I mean without directly seeing each other and only by means of distance communication? Go on reading...
- ⌚ How humans evolved from the animal ancestors into such a extremely complicated and highly intelligent beings. The experts hold different views on this question, but most agree that communication must certainly have played a decisive role.
- ⌚ In Africa people used drums to send messages to other tribes who were far away. They could warn a tribe that a stranger was approaching or could convey a message from one person to another.
- ⌚ Txalaparta was an instrument of communication used by the people of Spain. It was made of wooden planks leaning over logs. When hit with a special tick, it would produce a sound. People were able to send messages by producing different sounds on the Txalaparta.
- ⌚ Around 3000 years ago, king Solomon and the queen of Sheba exchanged messages by carrier pigeons. The Egyptians and the Persians first used carrier pigeons long long ago. First a message would be written on a piece of paper, then that paper was neatly folded and secured and attached to a pigeon's leg. Once the pigeon was released, it would fly back to its home (destination).
- ⌚ The Morse code was devised by Samuel Morse an American in the year 1836. It is a system of 'dots and dashes' for sending messages. Each letter or numerical is represented by a unique sequence of dots and dashes. The duration of a dash is three times the duration of a dot. Morse code is the single wire telegraph.
- ⌚ Pony express was a fast mail service in USA in the year 1860. Letter messages were carried on horse backs. In India we have Indian post office which delivers letters to our home even today.
- ⌚ Alexander Graham Bell invented the telephone on 10th march 1876. "Mr.Watson, come here. I want to see you ", said Graham Bell and it was the first

sentence spoken by man over telephone calling his assistant Thomas Watson. The telephone has made distances seem less, and the world smaller.

- ① Marconi, an Italian inventor proved the feasibility of radio communication. On December 12th 1901, Marconi's wireless telegraph equipment picked up the signal which travelled 3500 kilometers. Radio is proved to be a historical land mark.
- ② In England in 1920 s, John Baird, a Scottish scientist, successfully transmitted the first TV picture. Television is a way of sending and receiving moving images and sounds over wires or through the air by electrical impulses / electromagnetic waves. Television has made revolutions in entertainment, journalism and social behavior.
- ③ On April 3, 1973, the first cell phone call was made by Cooper, a Motorola engineer to the head of bell labs "Joel this is Marty Cooper calling from a cell phone, a real hand held portable cell phone". This is presumed to be the first cell phone call. Cell phone revolutionized the way human beings communicate. We can communicate on the move, from anywhere and everywhere.
- ④ Electronic computers were developed in the year 1950. (The actual credit for founding must go to Charles Babbage - that is another history). Packet networking, packet switching and internet protocol and ARPANET, the first internet connections were made at the University of California, los angels in the year 1960. In 1982 the 'internet protocol suite (tcp/ip)' was introduced. Internet service providers (ISP) began to emerge in 1990. In the year 1995 internet was allowed to carry commercial traffic. The internet is the largest computer network in the world. It links millions of smaller networks connected to each other by phone lines, cables or wireless connections. Through internet we can get the following services: e-mail, instant messaging, voice over internet protocol (VOIP) telephone calls, two way interactive video calls (video conference), watch video, listen to music, world wide web (www), discussion forums, social networking (facebook, twitter) and online banking, online shopping and what not.
- ⑤ Today people rarely write letters- they send e mails instead. Your message is first delivered to the computer called mail server. From there it is transferred through the net, until it reaches its destination. Just as you need to know a person's address to send a letter, you have to know a persons e mail address to send an e-mail. Now coming back to my original doubt (refer first paragraph), our college English Department HOD Dr. A.S. Mohamed Rafee's friend Mr. Agathiyar directed one tamil film called "Kadhal Kottai". Watch that film. You may get the answer. By the way this is not to advertising a film. My purpose is to inform you that if you communicate efficiently and effectively you will get success in your profession.

E-JOURNAL FOR PROFESSIONAL DEVELOPMENT

Prof. A. Zakiuddin Ahmed, Assistant Professor of Computer Science

Introduction

Electronic journals (e-journals) are often referred to as "electronic publishing", "electronic serials", "online journals" and "electronic periodicals". The most attractive feature of e-journals is the minimum turnaround time. It is of great value for communicating the research result. The popularity of e-journal is also due to the fast and easy access to information. It is possible to retrieve a particular article using search engines. This is facilitated by keywords and author search, provided by publishers.

Gail MacMillan defines E-journal as "any serials produced, published and distributed nationally and internationally with the help of internet". According to the W. Jones, "E-journals are available electronically via a computer or computer network that may or may not be published in some other physical medium".

Features of E-Journals

E-journals are becoming increasingly in demand both as means of rapid desktop access to current research materials and as a way to view available archives. They offer the following wide range of potential advantages to researchers:

- ① • It allows remote access
- ② • It can be used simultaneously by multiple researchers
- ③ • It provides timely access 24*7
- ④ • It supports different searching capabilities
- ⑤ • It can support multimedia information
- ⑥ • It can be saved digitally
- ⑦ • It can be environmentally valuable
- ⑧ • A major source of information for scholars and researchers

As a result of the above advantages, libraries today buy licenses for an ever-increasing number of E-journals from a range of different publishers and providers and use a diverse set of technologies for information delivery.

Role of E-journals for Professional Development and Research

UGC-INFONET e-journals consortium initiative was undertaken by the UGC to facilitate free access to scholarly e-journals and databases

in all fields and disciplines by the research and academic community across the country through joint partnership of UGC, INFILIBNET and ERNET. All universities and colleges who are under the purview of UGC have been provided UGC-INFONET connectivity and access to scholarly e-journals and database. More than 4500 full text e-journals are available now.

Notable E-journals

1. DIRECTORY OF OPEN ACCESS JOURNALS: <http://www.doaj.org/>
There are 2514 journals in the directory. Currently 747 journals are searchable at article level. As today 12415 articles are included in the DOAJ services.
2. FREE FULLTEXT.COM : <http://www.openj-gate.com/>, <http://www/freefulltext.com/>
3. PUBLIC LIBRARY OF SCIENCE : <http://www.plos.org/index.pub.PLOS>
It's a non-profit organization of scientists and physicians committed to making the world's scientific and medical literature freely available.
4. FREE MEDICAL JOURNALS : <http://www.freemedicaljournals.com/>
htm/index.html
5. COMPUTER SCIENCE & INFORMTION TECHNOLOGY : www.ijarcsse.com/

International Journal of Advanced Research in Computer Science and Software Engineering (IJARCSSE). A scholarly online journal with open access system
www.cscjournals.org/journals/IJCSS/description.php

International Journal of Computer Science and Security (IJCSS) is a peer reviewed open access journal publishing the state of the art research in computer science.

www.springer.com › Home › Computer Science
Computer Science - Books, Journals, Electronic Media from Springer.

Conclusion

E-journals play an important role in professional development of both teachers and researchers in universities and colleges. E-journals also help the researchers for the review of literature for collecting historic information to proceed with further research work in the select area of interest.

HOPE

Come let's wait for the day to break,
 Birds to sing and a night to dawn,
 Let's hope to see a bright new day,
 Fill sweet smell on a sweet fine morn.

Things do change and come our way,
 Chances golden, like the morning sunray
 Spreading the warmth and light far,
 For every flow'r and millions and millions everyday

Morning dew on every flower new
 Shines and smiles and is happy too
 Fresh air, fresh day, makes our life,
 Full of fresh fragrance, living worthwhile

Hope of the new, hope of a few
 Hope is daybreak, hope is a day new,
 Hope brings colour true, drives away the blue,
 Hope only -- lights our life and sheds the darkness too.

M. A. Uzeifa Rashida
 Assistant Prof. of English

USES AND ABUSES OF LEISURE

S. Asma-ul-Husna, III BSc Microbiology

Leisure time is like money given in the hands of a young person. It can be utilised either in a right way or in a wrong way. Some people waste the leisure time gossiping, watching unwanted films and programs on TV screen or playing video games or computer games. Leisure time can be utilised for cultivating good hobbies. One can read good books which will develop the personality. Leisure can be used for learning new languages both national and foreign. One can do gardening in the leisure time. It will make one fit both physically and mentally. One can go to the neighbouring rural areas during leisure and help the people there by making them learn to read and write. This can be done by forming a team which may consist of one's own friends. One can go from house to house during leisure time and collect their used and unwanted books, shoes, clothes etc. and start distributing them to the poor and needy. By watching one's way of spending their leisure time, the personality of the person can be assessed to know whether he is good or bad.

There are three kinds of hours in a man's life: waking hours, sleeping hours and leisure time. During waking hours, one can do one's routine work only. One cannot be creative. And sleeping hours are meant for sleeping. It is the leisurely hours in which one can do something useful to oneself and to others. It is perhaps the most important time of one's life. One should not waste it. All achievements in life have come through leisure time work only. So let us learn to make use of the leisure time.

Exams

E xams are coming near

E T hat's what I fear

T W hy didn't I pay attention
T he whole year?

T N ow I'll have to study
N ill day, Oh dear!

A

T he whole year I only played cricket
B ut never even took one wicket!

B I 'll have to study all day and night
I my schedule will be really tight.

M

I T have to get good marks
T hat will be a very tough task

T hat's the disadvantage of not
studying the whole year.

N S

S getting good marks is a thing I cannot bear
W ity, study and study all day long

I ith no time to even sing a song

.....wait for the exams to get over.....

o that I can be happy like a flower

PROPOSAL FOR IMPROVING MY TOWN OR VILLAGE

My village is an undeveloped one in South India. There are one hundred small houses in my village with fifty huts. The main occupation is agriculture. But there is no proper road in the village. There are two hundred children between the age of five and ten in the village. But there is no school or health centre in it. There are twenty educated youths in my village. We are planning to make our village modern. One of our village friend's father is a political leader. He has promised to help us. We have given the proposal to the government for the uplift of our village. The government has promised to lay proper roads in two months.

There are four wells and one lake in the village. We have water problem. Here we have started collecting materials at our own cost for laying pipe lines for bringing water to each street in the village. The elders of the village, have collected money to buy furniture and other items for running a school. One of land owners has donated his uncultivated land for building a school. Our college friends have collected donation and the school will be ready in one month. The government has appointed two teachers (from our neighbouring towns) to the school which is to be inaugurated next month. There is no doubt, my village is a model village with all the basic facilities now.

STRESS FREE LIFE

P. MOHAMMED SALMAN

III BBA

Life is full of happy moments and as well as sad, problematic moments.

L Everyone has problems in life. But there are two types of persons: 1. Persons who face the problem by accepting minimum stress and 2. Persons who treat small problems as if they are big and crucial ones. If we take a problem as problem, then the problem remains a problem. But if you don't, you will not get stressed so that you can solve your problem with a free mind. If you are not depressed in that situation then you can solve it easily.

- ① First and foremost thing is to become optimistic. Many persons will think only about future so they lose the present moment to enjoy. You have to think of the future less, so that you may able to enjoy the present moment.
- ② Then the next thing that you have to do is to try to be honest to everyone so that you do not have to feel sinful because it gives you negative thoughts.
- ③ Never feel depressed at any problem, because you will not be able to face problem when you fell depressed.
- ④ You have to avoid gossiping, and to avoid people who gossip a lot, because gossiping is the very worst and messier act.
- ⑤ Men feel stressed due to office work and women due to home chores. When you are engaged in a work don't go to another task, complete the first task and then go to the next task, if you leave the current task and go to another task means the burden of first incomplete task will give you more stress.
- ⑥ This one is for students: I've heard and known that many students commit suicide because of fear of future. Student life is the best part of our life. Enjoy this part of life. If we treat the subjects and books as our friends, then there will be no stress nor fear.

FUN WITH NUMBERS

If one multiplies number 37 by 3,6,9,12,15,18,21,24,27(Arithmetic progression)
the results seen wonderful as:

$$37 \times 3 = 111$$

$$37 \times 6 = 222$$

$$37 \times 9 = 333$$

$$37 \times 12 = 444$$

$$37 \times 15 = 555$$

$$37 \times 18 = 666$$

$$37 \times 21 = 777$$

$$37 \times 24 = 888$$

$$37 \times 27 = 999$$

FUN WITH MULTIPLICATION

$$9 \times 0 + 8 = 8$$

$$9 \times 9 + 7 = 88$$

$$9 \times 98 + 6 = 888$$

$$9 \times 987 + 5 = 8888$$

$$9 \times 9876 + 4 = 88888$$

$$9 \times 98765 + 3 = 888888$$

$$9 \times 987654 + 2 = 8888888$$

$$9 \times 9876543 + 1 = 88888888$$

$$9 \times 98765432 + 1 = 888888888$$

$$9 \times 987654321 + 0 = 8888888888$$

$$0 \times 9 + 1 = 1$$

$$1 \times 9 + 2 = 11$$

$$12 \times 9 + 3 = 111$$

$$123 \times 9 + 4 = 1111$$

$$1234 \times 9 + 5 = 11111$$

$$12345 \times 9 + 6 = 111111$$

$$123456 \times 9 + 7 = 1111111$$

$$1234567 \times 9 + 8 = 11111111$$

$$12345678 \times 9 + 9 = 111111111$$

$$1 \times 8 + 1 = 9$$

$$12 \times 8 + 2 = 98$$

$$123 \times 8 + 3 = 987$$

$$1234 \times 8 + 4 = 9876$$

$$12345 \times 8 + 5 = 98765$$

$$123456 \times 8 + 6 = 987654$$

$$1234567 \times 8 + 7 = 9876543$$

$$12345678 \times 8 + 8 = 98765432$$

$$123456789 \times 8 + 9 = 987654321$$

I LOVE MY PARENTS

MOHAMMED NAWAZ, III BBA

Life without parental support can be a disaster. My Parents are one of the most amazing people you can find around the world for all the sacrifices they had made for me. I have great parents, and I still live with them. They help me in every step of my life. They never turned me down or made excuses about it. They are sweet and lovely. They love me and they would give their life for me. I thank God for such a precious gift. My parents never give up caring for us. They make me realize my mistakes but never punish. They have spent many sleepless nights for me. They provide such a wonderful life that they can never see any shade of sorrow on my face. They strive to make my future bright. They are good leaders. They guide me at my every step. They share their experience and their feelings with me. For my happiness they forget their wants and needs. Before I ask they fulfill my requirements. I thank wholeheartedly and praise Almighty Allah for showering His blessings on me in the form of my parents. Be good and kind to your parents so that your recompense is paradise, and if you have been disowned by them, your abode shall be the fire (of Hell)." Al-Kafi, Volume 2, page 348.

Once a person approached the Messenger of Allah (pbuh) and said: 'O' Prophet of Allah! I have committed every known evil act. Is there a chance that I may be forgiven?' The Messenger of Allah asked him: 'Are any of your parents still alive? The man replied: 'My father.' He said to him: 'Go and be good and kind to him.' When he left, the Messenger of Allah muttered: 'If only his mother had been alive.' (Biharul Anwar, Volume 74, Page 82). Almighty Allah said in Quran a person who takes care of his parents and follows their instructions will get success in his life without facing any kind of problem. A person who obeys his/her parents and agrees with all their differences and conditions that they place before him, then this person is a real hero in his life.

PROVERBS

A close mouth catches no flies

A fair face may hide a foul heart

A friend's frown is better than a foe's smile

A lie begets a lie

A tree is known by its fruit

All things are difficult before they are easy

Be slow to promise and quick to perform

Better a glorious death than a shameful life

Better be alone than in bad company

Doing is better than saying

Everything comes to him who waits

Evil communications corrupt good manners

Habit cures habit

He cannot speak well that cannot hold his tongue

If you cannot have the best, make the best of what you have

In every beginning think of the end

Money spent on the brain is never spent in vain

Zeal without knowledge is a runaway horse

LARGEST FOREST IN OUR PLANET

MOHAMMED SAADH .M B.Sc (Computer Science)

The world's forests range from tropical forests found between the Tropic of Cancer and the Tropic of Capricorn, temperate deciduous forests found largely in the Northern hemisphere and montane coniferous forests found in the world's temperate regions. In the past 50 years, around half of the world's original forests have been destroyed, leading to many species becoming threatened and many indigenous communities' livelihoods being put at risk.

Forests are vital for us to survive as they absorb carbon dioxide during photosynthesis and release oxygen into the atmosphere.

The 10 largest forests in the world need to be preserved now, before it is too late. The below list of forests in order of their size has been compiled using statistics from the United Nations Food and Agriculture Organization in 2005.

1. Russia

809 million hectares: The vast forests of Russia stretch from Karelia near Finland to the Kamchatka Peninsula in Russia's far east and the forests contain 50% of the world's resources of coniferous wood. The forests of Russia are home to countless species including Siberian snow leopards and Siberian tigers and 10% of all wild tigers are found in the country. 260,000 square kilometres of forests are managed by the Forest Stewardship Council, which helps ensure sustainable logging and 430,000 sq km of land is under Russian government protection. Illegal harvesting of trees is estimated to account for between 20-30% of all logging within Russia.

2.Brazil

478 million hectares: Brazil is home to the world's largest tropical forest, the Amazon rainforest which accounts for over half of the earth's remaining rainforests. The Amazon contains 90-140 billion metric tons of carbon, which helps stabilise the earth's climate and also produces 20% of the earth's oxygen

through converting carbon dioxide to oxygen. The Atlantic forest is also found in Brazil, on the coastline and stretches from Brazil to Paraguay and Argentina. However, only 7% of the forest remains intact which is threatening the lives of thousands of species including jaguars, tapirs and howler monkeys.

3.canada

310 million hectares: Nearly half of Canada's land surface is covered by trees and forests which help purify water, stabilise soil and cycle nutrients according to the Canadian Forest Service. An estimated two-thirds of Canada's 140,000

species of plants and animals reside in the forests which are made up of 180 different tree species. 94% of the forests are publicly owned, with the other 6% being held by private landowners. 20% of the world's freshwater is found in these forests, an equal percentage to the amount found in the Amazon rainforest.

4.united states

303 million hectares: Since colonists started settling in the USA in the 1600's,

approximately 121.405 million hectares of forest have been cleared mostly for agriculture, settlement building and timber. 155.399 million hectares of forest cover the eastern USA, 74% of these forests are broadleaf and 83% are owned privately. In the western part of the country, 147.710 million hectares of forests, 78% of which are coniferous, are 58% publicly owned.

The publicly owned forests are maintained as national parks, wildlife protection zones and recreation grounds by the U.S. Forest Service, National Park Service,

Fish and Wildlife Service and the Bureau of Land Management.

5.china

197 million hectares: The UN Food and Agriculture Organization estimates that forest and timber plantations increased in size in the country from 157 million hectares in 1990 to 197 million by 2005. Between 2000 and 2010 China's forest cover increased at an annual rate of 1.6%. However, as much as half of China's timber

is imported, mainly from tropical rainforests like the Amazon which puts enormous pressure on tropical ecosystems. 70% of China's forests are owned by the state and there are a total of 131 forest bureaus in the country

6.Australia

164 million hectares: The native forests of Australia are made up primarily of eucalyptus (78%), acacia (7%) and melaleucas (5%). These forests are generally located in areas with more than 500 millimetres of rainfall per year and outside the interior of the country, which is arid and dry. Wildfires are a major threat to forests in Australia and foresters have to implement strategies for fire prevention, suppression and detection in order to minimise forest fire damage.

7.Dem republic of congo

134 million hectares: The Congo basin rainforest is home to over 10,000 plant species, 700 fish species, 400 mammals including the pygmy chimpanzee and 1,000 species of bird. Forests cover 58.9% of the countries land, over 828,812 square kilometres (515,000 square miles). 8% of the countries forests are currently under

protection however, the DRC's government plans to expand this to 10-15% in the future.

8.Indonesia

88 million hectares: Indonesia's rich forests are home to 38,000 species of

plant, 1,531 species of bird, 515 species of mammal, 270 species of amphibian and 35 species of primate including the orangutan and the proboscis monkey. The countries forests once covered 84% of the land but the last remaining forests are now fragmented by roads and destroyed to make way for palm oil, pulp and eucalyptus plantations.

The forests of Sulawesi have been almost completely destroyed while the forests of Sumatra and Kalimantan have been severely depleted.

9.Peru

69 million hectares: Forests, 80% of which are primary forests, cover approximately 50% of Peru's territory and the country contains an astounding 10% of the world's flora and fauna including 25,000 plant species. 1,300 indigenous communities live in 12 million hectares of Peru's forests, 9 million of which are

set aside as indigenous territory. The UN Forest and Agriculture Organization estimates that 224,000 to 300,000 hectares of forest a year are deforested, a far lower rate in comparison to neighbouring Latin American countries.

10.India

68 million hectares: WWF estimate that 20.64% of India's territory is covered in forest from the Himalayan subtropical pine forests to the mangrove forests of eastern India. The forests are home to 45,000 plant species and 81,000 animal species including the Bengal tiger and Indian elephant. The two major forest areas of India are the Western Ghats, found in the Andaman and Nicobar Islands and the greater Assam region in the north-east. With India's rapidly growing economy, more pressure is being placed on forest resources and the remaining forests are becoming fragmented.

AMAZING FACTS

If you keep your eyes open by force when you sneeze, you might pop an eyeball out.

- Wearing headphones for just an hour will increase the bacteria in your ear by 700 times.
- The cigarette lighter was invented before the match.
- Like fingerprints, everyone's tongue print is different.
- "Rhythm" is the longest English word without a vowel.
- You can't kill yourself by holding your breath.
- Your heart beats over 100,000 times a day.
- The elephant is the only mammal that can't jump!
- The average lead pencil will draw a line 35 miles long or write approximately 50,000 English words.
- You're born with 300 bones, but by the time you become an adult, you only have 206.
- Butterflies taste with their feet.
- The strongest muscle in the body is the tongue.

Objectives of EDUCATION IN ISLAM

Islam offers man a complete code of life in Qur'an and sunnah which followed wholeheartedly, lead man towards the realization of the greatest glory that Allah has reserved for him as vicegerent.

In order to adequately follow the code of Islam, man needs training from his childhood both at home and in society in which he lives. This training should encompass his total personality, his spirit, intellect and rational self, imagination and bodily sense and should not be of one part at the expense of others.

His belief in the code and practice in accordance with his faith is possible only when the training is so organized that all other aspects of his personality are dominated by his spiritual self which alone can receive and strength faith, develop this will power and lead him to good deeds and salvation.

AIMS OF EDUCATION

- ① ⑤ ♦ Education should aim at a balanced growth of personality through training of spirit, intellect, rational self, feelings and bodily sense of man. The training imparted to a Muslim must be such that faith is infused in whole of his personality and creates in him an emotional attachment towards Islam and enable him to follow Quran and Sunnah and be governed by the Islamic system of values, willingly and joyfully so that he may proceed to the realization of his status as vicegerent to whom Allah has promised the authority of the universe.
- ② ⑤ ♦ Education should, therefore, cater for the growth of man in all its aspects: spiritual, intellectual, imaginative, physical, scientific, linguistic, both individually and collectively motivate these aspects towards goodness and

attainment of perfection. The ultimate aim of education in Islam is realization of individual's complete harmonization with the will of Allah at personal, communal, and human level.

- ⌚ ⑤ ♦ Education system in Muslim institution should be so shaped that it facilitates social mobility. all the barriers must be removed to provide equal opportunity to all Muslims to attain the highest qualification as per their intellect.
- ⌚ ⑤ ♦ Education should promote creative impulse to rule himself and the universe as a true servant of Allah, not by opposing and coming into conflict with nature but by understanding its laws and harnessing its forces for the growth of personality that is in harmony with it.
- ⌚ ⑤ ♦ Education, by precept and example, should install piety and encourage self-purification and self-discipline as a means of penetrating into the mysteries of the universe and opening the heart to the fear and love of Allah.

BODY LANGUAGE

R. VIDHYA M.Sc., MPhil.
Asst. Prof, Dept of Microbiology

Body language is the unspoken communication that goes on in every face-to-face encounter with another human being. It tells you their true feelings towards you and how well your words are being received. Psychologists say, we express our feelings and thoughts in gestures, movements and attitudes, unaware that we are doing so. Between 60-88% of our message is communicated through our Body Language, only 7-10% is attributable to the actual words of a conversation.

Your ability to read and understand another person's Body Language can mean the difference between making a great impression or a very bad one! It could help you in job interviews, meetings, business functions, or special date!

You may utter words that disguise your thoughts. You may leave things unsaid, even lie - but it is impossible to do so without your body language. You may use a lot of words to get your point across, but to anyone who can read the signs, the body 'speaks' simply and clearly.

BODY SIGNALS – Here are some ways of recognizing body signals

THE EYES

- ⌚☐ **Normal degree of opening** - taking in everything without any critical distinction.
- ⌚☐ **Wide Open eyes** - Feeling joy, fright, surprise and amazement. It also conveys a warning.
- ⌚☐ **Veiled eyes** - Expresses boredom, lack of drive, resignation and a certain mental dullness.
- ⌚☐ **Slit eyes** - Extreme mental concentration. When exaggerated, this look can express a narrow-minded, over-critical, petty even a jealous personality.
- ⌚☐ **Closed eyes** - No outer impressions are wanted. 'Leave me alone' attitude.
Screwed-up Eyes - experiencing or imagining unpleasant feelings such as fear, reluctance or displeasure.
- ⌚☐ **Blinking** - conveys embarrassment, insecurity or tension.

THE LIPS

- Pressed Lips** - disagreement, criticism and disapproval.
- Pursed Lips** - disapproval, arrogant and superficial character.
- Biting of Lips** - embarrassment, prevention of rash words.

THE HANDS

- Open Hands** - Trust in others, interest in other's opinions.
- Covered Hands** - concealing feelings and covering insecurity.
- Clinging Hands** - confusion and insecurity, fear of new situations.
- Twisted Hands** - complex personalities and a difficult emotional life.

THE FINGERS

- Upward Thumb** - sign of authority and often of encouragement to others.
- Upward Index Finger** - strictness, as shown by Teachers.
- Index Finger across mouth** - a sign of restraint (more prevalent in younger people)
- Rubbing Finger** - indicates a fear of confrontation.

THE LEGS

- Legs slightly apart** - indicates self confidence.
- Legs wide apart** - eagerness to impress.
- Feet parallel** - attentiveness

NOTHING CROSSED - Keeping arms, legs, and feet relaxed and uncrossed: I am open and honest.

LEANING FORWARD -- interest and attention.

LEANING BACKWARDS -- aloofness and rejection.

HANDSHAKE -- Not too hard and not too soft. Pay attention to how you are shaking someone's hand. So, smiling, making eye contact and asking open questions are all important for promoting conversation.

How many people realize that, upon meeting someone new, we have 10-20 seconds to make a favorable first impression? After that, we have approximately five minutes to confirm and establish a positive relationship. Not only do we form our opinions over such a short period of time, but our conclusions are drawn not from what a person says, but 95% of our insights are derived from non-verbal communication. You can communicate more forcefully by using your body effectively and harmonize your inner and outer attitude, so that you feel more relaxed and experience less stress in yourself and in your relationship with other people.

MILESTONES IN MICRONIOLOGY

S. RABIA BASRI, III B.Sc. Microbiology

Microbiology is the study of living organisms of microscope size, which includes bacteria, algae, protozoa and viruses. It aims to study their form structure, reproduction, physiology, metabolism, and classification.

Microorganisms are closely related and associated with health and welfare of human beings. Some are beneficial and some are harmful. The science of microbiology did not start until the invention of microscope in 16th century.

The period between 1865 and 1862 also called as Golden Era. Where the pioneering works of Louis Pasteur, Robert Koch, Lister etc... The important discoveries and laid the foundation of microbiology.

Louis Pasteur was a French scientist born in Dole on 27th Dec 1822. He is the father of vaccine and he discovers Anthrax, Cholera vaccine.

Robert Koch a German doctor confirmed the germ theory of Disease in 1876.. He studied the life cycle of Anthrax bacilli and discovers potent pathogens of Mycobacterium tuberculosis and their protein tuberculin and put forward a hypothesis known as Koch Postulates.

Joseph Lister developed a method of sterilization of surgical instruments, use of disinfectant dressing and conduct of surgery under spray of disinfectant and succeeded in reducing airborne infections and thus preventing surgical asepsis and he is the Father of Antiseptics.

CONTRIBUTIONS OF MICROBIOLOGY

Hooke - In 1655 first observation of cells, cell theory

Van Leeuwenhoek - In 1673 First observation of live microorganisms and bacteria.

Linnaeus - In 1735 Nomenclature for organisms.

Jenner - In 1798 First Vaccine for smallpox.

Louis Pasteur - In 1857 Fermentation, disproved spontaneous generation and in 1864, Pasteurization.

Lister - In 1867 chemical disinfectant to prevent surgical wound infection - aseptic surgery.

Ehrlich - In 1908 speculated about a "Magic Bullet", destroy pathogen without harming host, developed drug to treat syphilis, theory of immunity, used first synthetic chemotherapeutic agent Developed acid-fast Stain.

IMAGES OF INDIA IN NISSIM EZEKIEL'S POEMS

1. Introduction

Nissim Ezekiel (16th December 1924 to 9th January 2004) was born in Bombay in Maharashtra. His father Moses Ezekiel was a professor of Botany at Wilson College, and his mother was the principal of her own school. He studied in Bombay and later stayed for a brief period in England. He married Daisy Jacob in 1952. His first book "The Bad Day" was published in 1952. He headed the department of English of Mithibai College, Bombay and also, was the visiting professor of University of Leeds and University of Pondicherry for a brief period. He is considered as the foremost among the modern Indian English poets.

The dominant passion of Ezekiel's life is poetry and he has taken to his vocation with a genuine and real commitment. John B Beston asked Ezekiel, "Writing in English in India, would you see yourself essentially as an Indian poet, or a world poet?" Ezekiel answered, "I regard myself as an Indian poet writing in English. His poem "The Night of the Scorpion" is used as the study material in Indian and Columbian schools. He penned poems in Indian English and his poems are used in NCERT English Textbooks. His works have passions, excitements, and delights with philosophical, rational and idealistic insights dealing with lively images of his country and his people. His poems are satirical, ironic, mordant, sarcastic and scornful about modernity, culture and urbanity of India.

Imagery means the ability to form mental images of things or events and describing them with mental pictures. It means figurativeness, allusion, insinuation, citation, symbolism, even metaphor or simile. It creates visual pictures of ideas in our mind and it is more complex than the ordinary pictures to understand. Many great poets have developed special techniques to create mental pictures lively in the mind of the readers and showed high talent by creating visual pictures with words that appeal to our five senses such as sight, hearing, touch, taste and smell. It is an extra ordinary talent and ability of the poet to create such images in our minds.

The great poet Nissim Ezekiel has written poems with lively images. The Post-Independence Indo-Anglian poetry begins with Nissim Ezekiel. He portrays, reveals and exposes true image, vision and reflection of life of his country. The images are so effective that a reader cannot forget the image created by this great poet on them as he tries to present his views and ideas through the powerful images to the readers of India.

2. Image of India

The image of India and its superstitions have been clearly narrated in Ezekiel's poems and he considered like Naipaul that the country is marching very fast towards devastations but he is hopeful of a great change and that change he wants to bring in the Indians through his poems. Ezekiel forms the true image of India through these lines:

Here among the beggars,
 Hawkers, pavement sleepers,
 Huntsman dwellers, slums,
 Dead souls of men and gods,
 Burnt-out mothers, frightened
 Virgins, wasted child,
 And tortured animal,
 All in noisy silence
 Suffering the place and time
 I ride my elephant of thought (In India)

The image of India is presented in a gloomy manner. He talks about the beggars and hawkers of India as they are wandering in the cities. The image of slum is also very dismal and depressing as the poet only saw the dark side of India. He uses the irony here to describe how India is noisy in silence. The terror in the country has also seen in the lines as the poet used the words frightened virgins and wasted children. He presents another image of India:

Barbaric and sick with slums
 Deprived of seasons, blessed with rains Its
 hawkers, beggars, iron-lunged,
 Processions led by frantic drums,
 A million purgatorial lanes,
 And child-like masses, many-tongued
 Whose wages are in words and crumbs (A Morning Walk)

The poet presents the diversity in the life style of people in India and the ironies and vicissitudes of Indian life find a place in his poetry through proper images. The plight of the teeming masses that lack the basic amenities of life and the people living in city slums have to face many hardships in every day life. He never dissatisfied like Naipaul on the habits and customs followed by the Indian but dissatisfied only with the devastating culture and civilization of the land which

hindered the true humanity to develop and flourish in India. His poems show the images of native tradition and culture.

He satirizes the evils of modern society like materialism, artificiality, pollution, corruption, selfishness, egoism, self-interest, brutality, vindictiveness, heartlessness, unkindness, ruthlessness and cruelty in true and finest images so that the citizens of his land understand them and these images would guide them and bring an awareness to them to lead a blissful, peaceful, harmonious and wonderful life in their native land.

3. Image of Indian Cities

Ezekiel talks about the city of Bombay and says that it has diverted tension. He felt in reality the city is inhabited by sick people, with its sick hurry and divided aims. The Indian cities are full of foul air which is infectious, transmittable and contagious. He depicts the city of Bombay stripped of its glamour in a realistic manner. He was totally involved in a situation, which he felt to be hopeless. The universal darkness is made momentarily bearable. Bombay was the metaphor for the urban life in India.

We noticed nothing as we went,
 A straggling crowd of little hope,
 Ignoring what the thunder meant,
 Deprived of common needs like soap
 Some were broken, some merely bent (Enterprise)

He says that how people have become deprived of the culture in the urban lands. The image of modernity has been produced very effectively in his poems that make man to live like a machine and there would be no human relationships and life. His poem "Urban" has many lively images to express the unhappy experiences he felt in Bombay. He finds the city dwellers rootless as they belong to the vulgar turmoil, disorder, chaos and havoc of life and he calls them active fools.

At dawn he never sees the skies
 Which, silently, are born again?
 Nor feels the shadows of the light
 Receive their fingers as his eyes.
 He welcomes neither sun nor rain
 His landscape has no depth or height (Urban)

It is the symbol of any modern city that has the dehumanizing influence on human individuality. He bewails and expresses in true images that the modern

man has lost contact with nature in his poem "Urban". The man has lost his ties with the nature and searching the beauty in his technological world and modern science. The man lost his peace and searching that peace in the ultra-modern scientific globe that also in vain. Ezekiel says:

The unplanned city has a death-wish:

Every body is in the business, buying cures (Healers)

He believes that in reality the city is inhabited by sick people, with its 'sick hurry and divided aims'. The modern life in city is howling and crying and the true image of his poems shows the hustle and bustle of the city life.

4. Image of Indian Life

Ezekiel presents very gloomy and depressing images of the modern life in which man fails to recognize the true values and human relationships in India as he forgets the old traditions, wisdom and customs of the land, which are suitable for blissful living.

Ancient Indian wisdom is 100% correct,

I should say even 200% correct

But modern generation is neglecting -

Too much going to fashion and foreign thing (The Patriot)

The modernity has converted the man in to a machine and he finds no time to divert attention towards the values of life. Ezekiel says that the modern world has reduced and condensed the customs and cultures of the lands to nothing and people struggle to get hollow, futile, worthless, and useless happiness in the modern life and started searching that happiness in the modern India. He presents the image of modern life as:

Poster selling health and happiness in bottles

Large returns for small investments, in football pools Or

self-control, six easy lessons for a pound

Holiday in Rome for writing praise of toothpaste (A Time to Change and Other Poems)

Ezekiel has used very effective images to present the depressing life of the modern India to instruct the citizens to be careful about the modern trends and world scenarios which bring only devastations and anarchy. His lively images make the people of their countries to understand the hazards in the modern cities of India.

5. Conclusion

Nissim Ezekiel tries to visualize in true images, the world of harmony, peace, growth and prosperity amidst the chaos and crisis surrounding the individual in his poems. He explores the possibility of combining the secular outlook, with religious feelings in his lands. He understands that life is devoid of charm and aesthetic sense in the modern world and people start behaving like machines and this hostile, aggressive, antagonistic and unsympathetic environment does not allow the individual to coalesce with nature amicably and harmoniously.

His poems depict in true images, the Indian life in general and city life in particular vividly and realistically. He uses imagery cautiously, vigilantly, thoughtfully, wisely and judiciously and thus his images strictly remain functional, efficient, purposeful and not decorative and ornamental. The whole human race is standardized by losing all its shape, strength and vigor. He says that the individuality, identity, creativity are lost and man has become a mere anonymous creature in modern India.

Thus, Nissim Ezekiel, the great modern poet of English Literature uses the tool of imagery in his poems to convey, communicate, suggest, express and deliver his messages to the English World in general and India in particular, vibrantly, successfully and brilliantly.
